

“THE FEAR PUZZLES: FINDING SOLUTIONS TO STETHOSCOPES AND CLOWNS”

Scenerio

CHALLENGE 9 : MARYAM AND DANIYAL’S HIDDEN FEARS

Maryam, a 5 year old loves colorful lights but terrified of clowns. Her fear intensifies despite her parents comfort

Daniyal, A 7 year old , terrifies at night with a stethoscope .He avoids checkups , complicating his asthma problem.

FROM CARE BEARS FROM HGS

PROPOSED SOLUTIONS:

GAMIFIED GRADUAL EXPOSURE APP

INTERACTIVE COMFORT GAME FOR MARIYAM

Create a digital game where children interact with a virtual character

- Who experiences fears, like seeing clowns.
- The game would guide children through calming techniques.

Doctor Visit Simulation for Daniyal

- Develops an engaging virtual doctors office.
- Where childrens like daniyal can familiarize themselves to different tools. Like stethoscopes.

COLOUR OF CONFIDENCE WITH APPRECIATION

FUN FILLED ART GALLERY

FOR MARIYAM

- In this activity they would learn social interaction.
- For Mariyam she can paint her fear on paper as it is a character she can also do face painting it is totally dependent on parents creativity
- Give her badges and rewards for appreciation

- He can draw or paint his fear on paper or wall that would build confidence and will allow him to show feelings.
- Also reward him to encourage

COMPETITIVE ANALYSIS

FEATURES

What others provide;

- Parents usually comforts the childrenl..
- Doctors distract kids during check up.
- Avoid things that scares them.

What are idea consists of;

- Our solution is fun filled and engaging .
- It transforms fear into curiosity
- Can be scaled into apps,games and educational tools.

Features of solution 1;

- Easy and time saving.
- Less parental guide needed.
- Provides independency.

Features of solution 2;

- Build confidence
- Helps express thie feelings
- Make children learn calming techniques

“DIGITAL THERAPEUTIC : + POTENTIAL IMPACT!

Potential Impact and real life world connection:

- build confidence.
- improves emotional control.
- provides fun and a safe way to improve.
- helps childrens face a real life problem.

FUTURE PROPOGANDA

- Expand to cover more common childhood fear .
- Add gamified features.
- Create parent control corner.
- Promte AI powered growth.

TARGETED USER

THE CHILD

- The child is the primary user who needs therapeutic tools, support, and interventions to manage and overcome their fears.

THE PARENTS AND CAREGIVERS

- Parents and caregivers are crucial secondary users who need information, resources, and strategies to guide their child, create a supportive environment, and coordinate professional help.
